Proferred®

Quality Products You Can Trust!

Along with the largest and most diverse fastener inventory in the world, Brighton-Best International stocks the Award-Winning **Proferred®** brand, a complete line of construction fasteners, tools, industrial products, consumables and safety gloves.

Proferred Drywall, Self-Drill and Cement Board Screws, sourced from a single Certified Taiwan Factory, are the GO-TO screws for construction crews.

- **Proferred Drywallers™** perform 3X faster than the average drill time earning the 2018 Pro Tool Innovation Award for screw design.
- **Proferred Drillers™**, or Self-Drill Screws, are ICC Approved - An approval required by many government & municipality jobs throughout the U.S.

All **Proferred** screws are manufactured utilizing the highest quality cold headed wire available, and thread rolling dies are changed out frequently, assuring every screw manufactured maintains extremely sharp points and threads, providing our customers with one of the highest quality - most consistent - fastest installing screws in today's marketplace!

Offering full lot traceability, for stringent quality control, and color coded cartons for ease of product identification, **Proferred** screws are readily available in bulk, 1lb & 5lb package configurations.

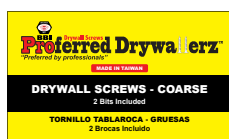

The award-winning **Proferred** line of products also includes Hand Tools, Cutting Tools, Abrasives & Rivets. Our hand tools carry a Lifetime Guarantee, have won the PTIA award 3 years in a row, and now includes safety supplies and consumables such as gloves, cable ties, tape & glue.

In addition to **Proferred**, BBI now offers construction professionals Ironclad® Performance Wear gloves. Born on a construction jobsite in 1998, Ironclad invented the high performance, task-specific work glove in direct response to the needs of construction professionals.

Prior to Ironclad, work gloves were non industry specific, offered minimal hand or impact protection, and got in the way of getting the job done. Ironclad filled the void by creating a new class of gloves that are: Industry Specific, Breathable, Washable, offering Highly Dexterity and overall excellent hand protection. These features have made Ironclad® gloves the go-to choice for construction professionals nationwide.

With over 70,000 SKUs, BBI offers competitive pricing, 20 U.S. distribution centers, 31 global, state of the art technology with 24/7 stock status and order entry via the web. BBI is committed to bringing quality, innovation, and safety to every job site.

Ideal for reducing rivet inventory and cost by taking the place of two or more sizes of standard rivets. Multi-grip blind rivets are specially designed for applications where materials of different thickness would generally require rivets in multiple sizes. Tip of the mandrel locks itself in the rivet eliminating the risk of the mandrel vibrating loose.

- IFI-116
- Body Diameters: 1/8" thru 1/4"
- Grip Range: 0.039" thru 1.00"
- Manufacture Process: Extruded

Ideal for reducing rivet inventory and cost by taking the place of two or more sizes of standard rivets. Multi-grip blind rivets are specially designed for applications where materials of different thickness would generally require rivets in multiple sizes. Tip of the mandrel locks itself in the rivet eliminating the risk of the mandrel vibrating loose.

METAL TO METAL - For Holding Two Or More Pieces Of Material Together Typically In Sheet Metal Applications.

C24R (Silicone Carbide Grain) for Cured Concrete, Masonry, Brick, Block, and Stone. Popular choice for masonry work.

A24R (Aluminum Oxide Grain) for Ferrous Metals, Structural Steel, Iron, and Rebar. A consistently performing wheel for a variety of applications

AC24R (Aluminum Oxide and Silicone Carbide Grain) for Ductile Pipe, Cast Iron, Concrete, Coated Steel, Sewer and Water Mains.

TA24R (Specialty Treated Aluminum Oxide Grain Hard Bond) for Thin Metals, Roofing, Decking, and Car Dismantling

Safety First – Always follow manufacturer's instructions and wear impact resistant safety goggles/shield & gloves.

WORK GLOVES FOR
CONSTRUCTION PROFESSIONALS**

TASK SPECIFIC HAND PROTECTION

WELCOME TO IRONCLAD

Ironclad was founded on a construction site in 1998 by Ed Jaeger. Ed noticed that while every specialist utilized dedicated, task specific tools, no one had addressed the special connection between tool and worker. With an extensive background in motorsports, Ed came from a world where glove performance, fit, and comfort were vital. It was at that moment that Ed saw his mission – to create gloves that were both protective and driven by performance, without sacrificing either. Thus was born a new glove technology that incorporated military grade fabrics, with an unrivaled fit and comfort, that would raise the industry to new standards.

WHAT SETS IRONCLAD APART

TESTING

Being on the cutting edge of glove innovation means venturing into uncharted territories. When it comes to evaluating performance, we go above and beyond traditional testing – we partner with scientists, leaders and experts in fields ranging from biomechanics to high tech outdoor gear, and create new ways to analyze, evaluate and test performance features of our work gloves.

At Ironclad, we understand that every job is different, every worksite is unique, and every hand is one-of-a-kind. We learn more by being in the field, with you, than we could ever know sitting in an office. That's why we spend so much time at jobsites, with front line workers, watching, learning, testing our ideas, and listening to your feedback. This is how every one of our glove designs gets created. So we encourage you to field test with us. Chances are we have just the right glove for you. And if we don't, we will build it.

FLAWLESS FIT SYSTEM

When it comes to fit, most glove companies stop at 2 measurements per glove – overall length and width. Not Ironclad. Our industry leading Flawless Fit is a proprietary 16-point measurement system that is unique to every one of our glove styles. So what do we measure? Inside

index finger length, top of cuff circumference, knuckle circumference, center of palm length, just for starters. 16 measurements left glove, 16 measurements right glove. That's 32 measurements per pair, per size. All with a tolerance measured at 1/10 of an inch. Why do we do it? Because it means our gloves will fit like no other glove on the market. That is the Ironclad Flawless Fit. That is Ironclad.

EXPANDING BEYOND GLOVES INTO NEW PPE

Ironclad has always focused on providing superior protection to the industrial athlete – through innovation, quality, comfort and durability. And now, it's exciting to expand beyond hand protection, and to bring Ironclad level quality, comfort and durability to head protection made right here in America."

Both the Yukon™ and Rainier™ Series are proudly Made in the USA to the highest engineering standards in the head protection industry. Designed for premium comfort, fit and protection, everything you have come to expect from Ironclad safety gear.
